## Summary

As a Full Stack developer focused on Front End I have been working with Web development since 2016, during this period I participated in building and maintaining several applications from different segments, financial, educational, and e-commerce. In that time as a developer, I've always been challenged to learn new technologies and generate good results in a short time. My main stack is Javascript | TypeScript, React, NextJs, Jest, RecoilJs, Apollo, GRAPHQL | REST, and NodeJs | C#, at the moment I've been studying Docker and AWS.

## Experience

### Software Engineer Front End

Object Edge

Oct 2021 - Present (1 year 8 months)

Working on international projects using English as a language main, I was part of a project where partner mechanics from the greater São Paulo can sell their automotive services in a marketplace to customers B2C and worked on building e-commerce for parts sales automotive, a project today with a large number of products registered and partnership with Bosch Brazil. I am currently working on an application configuration

Used Technologies: JavaScript | TypeScript, Reactjs, NextJs, RecoilJS, Jest, GRAPHQL, GIT, Storybook, Styled Components | Emotion, GIT, HTML5, CSS | SASS.
